

REPORT  
OF THE  
BOARD OF DIRECTORS  
AND SUPERINTENDENT  
OF THE  
STATE HOSPITAL  
RALEIGH, N. C.

FOR THE  
TWO YEARS ENDING NOVEMBER 30. 1912

## Officers of the Hospital

---

### BOARD OF DIRECTORS.

R. H. STANCELL, M.D., <i>President</i> .....	Northampton County.
Term expires January 28, 1917.	
S. G. DANIEL.....	Warren County.
Term expires March 9, 1915.	
S. O. MIDDLETON.....	Duplin County.
Term expires March 9, 1915.	
D. A. McDONALD.....	Moore County.
Term expires July 28, 1917.	
E. G. MOORE, M.D.....	Wilson County.
Term expires March 9, 1915.	
H. B. MARRIOTT, M.D.....	Nash County.
Term expires March 18, 1913.	
R. F. YARBOROUGH, M.D.....	Franklin County.
Term expires March 12, 1913.	
A. M. FAISON.....	Pender County.
Term expires March 12, 1913.	
R. H. SALISBURY.....	Martin County.
Term expires January 28, 1917.	

---

### EXECUTIVE COMMITTEE.

S. O. MIDDLETON, *Chairman*.

S. G. DANIEL.

E. G. MOORE, M.D.

---

### RESIDENT OFFICERS AND STAFF.

LOUIS J. PICOT, M.D.....	Superintendent.
CHARLES L. JENKINS, M.D.....	Assistant Physician.
W. W. STANCELL, M.D.....	Assistant Physician.
THOMAS O. COPPEDGE, M.D.....	Assistant Physician.
CHARLES HARDESTY .....	Steward.
MISS LULA M. STEED....	Secretary to Superintendent and Clerk to Board of Directors and Executive Committee.
MISS EVA M. HARDESTY.....	Bookkeeper and Secretary to the Steward.

---

### SUBORDINATE OFFICERS.

REV. COSTEN J. HARRELL.....	Chaplain.
MISS SALLIE F. FAUCETTE.....	Matron.
MISS ANNIE J. EAGLE.....	Druggist.
MISS BESSIE STRAYHORN.....	Head Nurse.
MISS MARGARET DICKS.....	Assistant Head Nurse.
A. J. BROWN.....	Head Nurse.
C. T. CAIN.....	Engineer.
T. A. HOLLIDAY.....	Carpenter.
JAMES S. ADAMS.....	Gardener.
C. H. BAUGH.....	Farmer.

*Report of the Board of Directors*

---

RALEIGH, N. C., December 11, 1912.

*To His Excellency, W. W. KITCHIN,  
Governor of North Carolina.*

SIR:—In transmitting to you the excellent biennial report of Dr. L. J. Picot, Superintendent of the State Hospital at Raleigh, the Board of Directors beg to call your attention to his recommendations as to the appropriations needed. We have carefully considered the same and have unanimously resolved that they are absolutely necessary for the proper care and comfort of the unfortunates under our care.

R. H. STANCELL,  
*President Board of Directors.*

## *Report of the Superintendent*

TO DR. R. H. STANCELL, *President, and Gentlemen of the Board of Directors of the State Hospital at Raleigh:*

I beg herewith to submit the biennial report of the affairs of this Hospital ending November 30, 1912.

INSANE DEPARTMENT.			
	<i>Males.</i>	<i>Females.</i>	<i>Total.</i>
Patients remaining November 30, 1910.....	310	384	694
Admitted during past two years.....	273	232	505
Number under treatment during past two years....	583	616	1,199
Average daily population .....	384	470	854
Discharged during past two years.....	288	209	497
Discharged as restored .....	188	136	324
Discharged as improved .....	7	2	9
Discharged as unimproved .....	5	3	8
Discharged as not insane.....	3	3	6
Transferred to other hospitals.....	10	6	16
Died during past two years.....	75	59	134
Per cent of recoveries on admission.....			64
Per cent of discharges on admission.....			98
Per cent of deaths on number treated.....			11

The percentage of discharge is very large. You will note that with eight more patients added to the list of discharges it would be equal to the number admitted during the past two years.

EPILEPTIC DEPARTMENT.			
	<i>Males.</i>	<i>Females.</i>	<i>Total.</i>
Remaining November 30, 1910.....	93	55	148
Admitted during past two years.....	45	48	93
Number under treatment during past two years....	138	103	241
Discharged as improved .....	33	17	50
Discharged as not epileptic.....	1	3	4
Died . . . . .	14	25	39
Remaining November 30, 1912.....	90	58	148

SUMMARY OF THE TWO DEPARTMENTS.	
Total number of patients remaining November 30, 1910.....	842
Admitted during the past two years.....	598
Total number under treatment during past two years.....	1,440
Average daily population .....	1,002
Discharged during the past two years.....	590
Died during the past two years.....	173

So far I regret not to be able to report any cures among the epileptics, the saddest of all people afflicted. Current medical literature reports some cures in one hospital with the use of crotalin, the venom of the rattlesnake, and I am anxiously looking for further favorable reports

from the use of this substance. I am hoping, further, to make personal observation of the treatment with this remedy. The fifty cases of epilepsy discharged as improved, we attribute largely to dietary and hygienic methods. There are in this Hospital nine male and six female epileptics: a total of fifteen, never transferred to the colony buildings. They were kept here to make room for those applying for admission and are accounted for as other patients in the Hospital. As soon as room can be provided these should be placed in the colony buildings for epileptics so that they can be more easily kept upon a uniform treatment. There are only two pay patients among the epileptics. The total number of pay, or partially supporting patients in the whole Hospital aggregates twenty-three.

One male patient, harmless and incurable, in the past year, has been sent, upon his own urgent and constant petition, to the county home of his settlement. One patient, a female, was discharged upon a writ of habeas corpus by Associate Justice, Hon. George H. Brown, on account of the irregularity of the commitment papers by the Clerk of the Court. One patient, a male, was sent to his home in the State of New York; another patient, male, was sent to his home in Virginia. Two patients committed themselves under the statute provided in such cases. Three patients at home on probation returned to the Hospital of their own accord and are still under treatment.

There are four harmless male and three female idiots that should be sent to the county homes of their respective counties to make room for curable cases. There is one patient, a Syrian, homicidal and dangerous, admitted from the Wake County Home. He should be deported to his native country as an undesirable alien. I have been trying, without effect, through the proper legal channels, to accomplish this end.

I am glad to report that there have been no homicides or suicides. There have been no outbreaks of acute diseases among our patients. There have been, however, two cases of typhoid fever among our female nurses. Both of these ran a mild course and recovered. All of the remaining nurses were promptly inoculated with antityphoid bacterin and there was no further spread of the disease.

So far we have never admitted a male patient to the wards for the tubercular. There are only two female patients in the tubercular wards. This should be a good showing, as tuberculosis is nearly always prevalent in hospitals for the insane.

I regret to report that we have had during the past summer a great deal of trouble with the city water supply. Often it was too muddy for lavatory, cooking or laundry purposes, and totally nonpotable. We were forced to bring all the drinking water for patients, officers and

employees by hand in buckets from the deep well in the grove. The Hospital should not be allowed to face this condition again, and I most respectfully urge upon you to take the necessary steps to secure an adequate supply of pure water, preferably by the boring of deep wells. This system has succeeded most admirably in this immediate vicinity, notably at the State's Prison. It is held by various opinions that the Wake Water Company will be obliged in the near future to abandon its present plant. In that case Walnut Creek, flowing through our grounds, would furnish an ample supply of water for an indefinite term of years. This problem confronting us is most grave and merits your most careful thought. Water is a crying need and should be as free as air.

We have been compelled, on account of the magnitude of the work, and the impossibility of its being done efficiently by one man, to employ a farmer and assign the duties of gardening, care of stock, lawns, flowers, trees, etc., to the former gardener. Despite the excessive and long continued drought, our patients have been supplied with an abundance of fresh vegetables all through the summer, and the winter garden assures a likewise plenty. The farm has done well, when we consider the extreme dry summer and the great difficulty of securing colored labor. This particularly on account of the railroad construction through our grounds and the consequent demoralization of labor.

Early during the present year we secured the services of a competent man, a chef, for the kitchen, and we find this a most economical measure in the saving of meats, lard and other foodstuffs, besides the distribution of foods to the different dining rooms is more uniform. We found it expedient also to install a diet kitchen to prepare food for the sick. We find this a great help. We have also equipped a meat cutting room with sanitary steel shelving and hooks, and all screened from flies. This has been a long standing need. We have also had the kitchen, the congregate dining rooms, as well as those at the colony buildings, screened against flies. This was much a needed measure.

Our cannery has done very efficient work under the supervision of the Matron. With the work of the patients alone it has made 42,540 cans of vegetables and fruits. (For detailed statement see report of Matron.) To the well, fruit is a luxury, and to the sick it is often a necessity.

We have selected a field, an ideal site for a vineyard, and upon this we have planted 1,850 grape vines. This should and doubtless will, yield an abundance of luscious fruit for the entire population and besides enough to make a sufficient quantity of the very purest and best wine for our old and feeble patients, and food flavoring for the sick.

The farm is being much improved in fertility and proper terracing.

It now produces the most luxuriant crops of alfalfa and we have come to rely mainly upon this for our hay supply.

The Steward's report, to which I especially direct your attention, shows the following cash receipts, expenditures, etc., for the fiscal years 1911 and 1912, with a cash balance unspent from our appropriation of \$49,598.06. I am sure this will be as gratifying to you gentlemen, as it is to us.

Appropriation for 1911 .....	\$175,000.00
Appropriation for 1912 .....	175,000.00
Cash receipts for 1911 and 1912.....	14,105.84
	<hr/>
	\$364,105.84
Expenditures for 1911 and 1912.....	314,507.78
	<hr/>
Balance .....	\$49,598.06

PERMANENT IMPROVEMENTS FOR TWO YEARS.

Dairy barn and cottage.....	\$1,190.18
Connecting corridors .....	3,675.00
Brick walks .....	320.00
Vegetable and fish house.....	430.00
Electric light plant.....	6,785.00
Farmer's cottage .....	1,675.00
	<hr/>
Total permanent improvements.....	\$14,075.18

Amount expended for maintenance, less permanent improvements .....	\$300,432.60
Average monthly expenses, including all expenses.....	13,104.49
Average yearly per capita cost, including all expenses.....	156.94
Average monthly per capita cost, including all expenses.....	13.08
Average monthly expenses, less permanent improvements.....	12,518.02½
Average yearly per capita cost, less permanent improvements...	149.92
Average monthly per capita cost, less permanent improvements..	12.49¼

I beg now to call your attention to the pressing needs of the Hospital:

The bath room floors in the Erwin Building are of wood, and have become sodden and offensive and should be replaced by concrete. The seventh, eighth, ninth, and tenth wards of the male building should be heated with the same system of water heating as the annex. The seventh ward having a northern exposure, is particularly cold during severe winter weather, and this is the ward for feeble and aged patients. (For estimated cost of the change see the report of the Chief Engineer.)

A matter of the greatest importance and particularly to which I wish to call your attention is the necessity for an amusement hall. When the present building was erected there was ample provision for its two hundred and fifty inmates. The old chapel is no longer able to accom-

moderate the patients, and its usefulness is at an end. Many patients are forced to attend divine services only on alternate Sundays, much to their regret. This condition also applies to every form of diversion or amusement. The present chapel can be enlarged by the removal of the rooms on either side and the insertion of steel girders and pillars. (For estimate of this construction see Steward's report.) I believe that it will be more economical by far than the construction of a detached building. In all institutions for the treatment of the insane music is held to be a necessity. Writers in all ages, sacred and profane, have described its soothing charms. There should be no stint in this form of diversion.

We need badly a small, well lighted and heated operating room. We have at present no place except the wards for any kind of emergency work. This places us at a great disadvantage in all kinds of surgical work. We also need a small pathological laboratory. Every hospital of any pretensions has one.

The floor in the ninth ward of the male annex is loose and badly bulged, unsightly, and needs relaying.

The present greenhouse is too small to hold the flowers, many of which are rare and valuable. It is not worth repairing and on its present site can not be enlarged. We need a new building, so situated that steam can with economy be transmitted to it. The patients delight in flowers and this taste should be encouraged and gratified.

The present boiler house should be removed to the railroad, a distance of about two hundred and fifty yards. This will do away with the necessity for the employment of an average of two and one-half mules and men to haul coal from the chute, besides the wearing out of one mule in one year. This will also abolish the drifting of smoke and soot into the laundry adjacent as well as the soiling of linen and furniture and blacking the walls all over the house. When there are prevailing southerly winds the whole house is flooded with smoke. The smoke-stack would only have to be removed and the present building be utilized for sleeping apartments for colored labor. We need this kind of room. Moreover, the building of a track from the railroad to the present site will destroy forever a considerable area of our very best garden land, and the passing to and fro of engines will be a continual menace to our patients. The railroad company proposes to pay to the Hospital the amount that they would have to pay for the construction of a spur track from the main line to the boiler house. The whole proposition resolves itself into the very evident economy of carrying the boiler house to the coal instead of bringing the coal to the boiler house. I believe this plan will appeal to your good judgment. (For cost of this work see Steward's report.)

The Hospital badly needs a dentist. Many patients suffer for the want of dental work. They can not properly masticate their food and indigestion with all its train of ills follows. This can be prevented by timely attention. I am informed that a competent dentist could be employed for seventy-five dollars a month.

To make room for all the applications on file for male epileptics and for all the female patients now in one of the colony buildings, I submit this feasible plan: Build an annex of four stories to the Barrow Building to accommodate ninety-six female patients and turn over the Woods Colony to the male epileptic applicants—forty-seven in number. (For estimated cost of annex I refer you to the Steward's report hereto appended.)

A nurse's home is needed. This should contain thirty rooms, and with this a sewing room, in case the present sewing room will have to be removed by enlarging the present chapel. It is always a hardship for the nurses to have to sleep in the wards with the patients, because they are constantly disturbed and rest-broken. To secure the efficient service of a nurse, she should have absolute quietude and comfort while she is off duty. (For estimated cost of this building see the Steward's report.)

The members of the Executive Committee have been regular and faithful in their attendance upon the meetings and I wish to tender them my gratitude for their wise counsel and cheerful help in many matters of business. Doubtful applications of patients have been constantly referred to their decision, so that I feel safe in reporting no declined meritorious cases. Two epileptic children were rejected, one five and the other eight years old. One man, an epileptic, eighty-four years old, was rejected.

I point with pride to our financial report. This shows a balance of our appropriation of \$49,598.06 to be returned to the State Treasurer.

Religious services have been regularly held and the patients and employees have shown appreciation of the ministrations of our Chaplain, the Rev. C. J. Harrell.

Dr. Thomas O. Coppedge, of Franklin County, was appointed an Assistant Physician in January last.

As a rule, all officers and employees have been faithful in the discharge of their duties.

Trusting to that Divine Providence that controls the destinies of men and nations, always,

Most respectfully;

L. J. PICOT.

*Superintendent.*

*Steward's Estimate of Proposed Buildings and Improvements*

---

Recommendation for appropriation for 1,050 patients, the capacity of the Hospital, for the year 1913.....	\$175,000.00
Recommendation for appropriation for 1,050 patients, the capacity of the Hospital for the year 1914.....	175,000.00
To build one new building, four stories high, with slate roof and all necessary plumbing and heating, gas and electric equipment, to contain ninety-six beds, four dining rooms, four bath and four toilet rooms complete, will cost to build.....	\$51,500.00
To equip the same.....	6,500.00
	<hr/>
	\$58,000.00
To change and install new heating system in the seventh, eighth, ninth, and tenth wards to conform with new annex.....	5,800.00
To change, move and rebuild power plant and make all necessary connections, complete .....	6,800.00
To build one greenhouse 22 x 80 with steam and water connections, complete .....	3,800.00
To build one chapel and amusement hall, 60 x 120, to seat one thousand people, complete .....	21,000.00
Or to remodel the third floor of the Administration Building to be used for chapel.....	7,500.00
To build nurses' home to contain thirty rooms, one general sewing room, with all plumbing and heating, etc.....	18,000.00
For painting and repairing exposed woodwork of all old buildings	3,700.00
To build and equip operating room and laboratory.....	2,500.00
To take up and relay cement floors in bathrooms.....	600.00

Respectfully submitted,

CHARLES HARDESTY, *Steward.*

*Report of Chaplain*

---

During the year I have conducted religious services in the Hospital chapel each Sunday morning at 9 o'clock. There are usually in attendance about two hundred patients and employees, which number taxes the seating capacity of the chapel. The appreciation of the services is manifest on the part of both employees and patients, as is evidenced by their respectful attention and constant attendance.

Respectfully submitted,

COSTEN J. HARRELL, *Chaplain.*

TABLE No. 1

SHOWING THE NUMBER OF ADMISSIONS AND DISCHARGES (INCLUDING CURES, IMPROVED, UNIMPROVED, AND DEATHS), AND THOSE FOR EACH YEAR SINCE THE OPENING OF THE HOSPITAL.

Date.	Admissions.	Discharged.						Remaining.

### *Steward's Report*

---

RALEIGH, N. C., November 30, 1912.

DR. LOUIS J. PICOT, *Superintendent, and the Honorable Board of Directors, State Hospital, Raleigh, North Carolina.*

GENTLEMEN:—Herewith appended is the Steward's report of moneys expended for the two fiscal years ending November 30, 1912.

Abstract A will show you the monthly cash receipts and expenditures.

Abstract B will show the expenditures classified.

Abstract C shows the products of the farm, garden, and dairy, with their market value.

Abstract D shows the operations of the mechanical departments.

You will note that the products from the farm, garden and dairy, owing to the extremely dry weather in 1912, do not average up as well as 1911; however, it is very gratifying to know that the farm, garden and dairy are now returning a handsome dividend over and above the operating expenses.

I wish to thank the Superintendent, the Executive Committee, and the Board of Directors for their support and coöperation. I also wish to thank the heads of the various departments which come under the Steward's supervision, notably the engineering, Carpenter's, farm and garden, laundry, store and culinary departments for their faithful services, diligent work, and the discipline maintained.

Owing to the increased volume of work in the culinary department we found it necessary to engage an experienced chef to take charge of the cooking and the distribution of the food, which we find from an economical standpoint to be highly satisfactory. We first employed Mr. Frank Brown, of New York, who stayed with us about eight months and then found it necessary to return to New York, after which we procured the services of Mr. S. M. Dupree, who, having been an employee in this department several years since, is thoroughly qualified to fill the position, and we find him to be highly satisfactory.

We have made, as you will notice, quite a number of very necessary permanent improvements, notable among these being the installation of the lighting plant, which we safely estimate is a saving to the institution of fifty per cent of the previous cost of gas and electricity, as we are at present driving the laundry and doing the ironing with power generated on the premises. We are using the exhaust steam from this plant for heating purposes, whereas prior to this we have been using live steam direct from the boilers.

Again thanking you gentlemen for your support and coöperation, I beg to submit the operations of this department hereto appended.

Respectfully,

CHAS. HARDESTY, *Steward.*

#### AMOUNT EXPENDED FOR MAINTENANCE AND PERMANENT IMPROVEMENTS.

Total expenditures for 1911 and 1912.....\$314,507.78  
Expended for permanent improvements in 1911 and 1912:

Balance on dairy, barn, cottage, etc.....	\$1,190.18
Connecting corridors .....	3,675.00
Brick walks .....	320.00
House for cleaning vegetables and fish.....	430.00
Electric lighting plant, complete.....	6,785.00
Farmer's cottage .....	1,675.00

Total expended for permanent improvements..... 14,075.18

Amount expended for maintenance, less permanent improvements . . . . . \$300,432.60

Average monthly expenditures, including all expenses.....	\$13,104.49
Average yearly per capita, including all expenses.....	156.94
Average monthly per capita, including all expenses.....	13.08
Average monthly expenses, less permanent improvements.....	12,518.25
Average yearly per capita, less permanent improvements.....	149.92
Average monthly per capita, less permanent improvements.....	12.49½

#### TOTAL RECEIPTS AND EXPENDITURES FOR TWO FISCAL YEARS 1911 AND 1912.

Total receipts for two years ending November 30, 1912.....\$364,105.84  
Total expenditures for two years ending November 30, 1912..... 314,507.78

By balance .....

\$49,598.06

#### CASH RECEIPTS FOR THE YEAR ENDING NOVEMBER 30, 1911.

Appropriation for 1911 .....	\$175,000.00
Cash receipts for December, 1910 .....	673.31
Cash receipts for January, 1911 .....	631.46
Cash receipts for February, 1911 .....	498.67
Cash receipts for March, 1911 .....	492.58
Cash receipts for April, 1911 .....	366.87
Cash receipts for May, 1911 .....	853.63
Cash receipts for June, 1911 .....	478.79
Cash receipts for July, 1911 .....	479.89
Cash receipts for August, 1911 .....	342.95
Cash receipts for September, 1911 .....	1,176.29
Cash receipts for October, 1911 .....	687.06
Cash receipts for November, 1911 .....	747.71

\$182,429.21

## Expenditures to date:

December, 1910 .....	\$12,177.57	
January, 1911 .....	11,201.75	
February, 1911 .....	14,455.21	
March, 1911 .....	13,211.96	
April, 1911 .....	15,363.73	
May, 1911 .....	12,033.85	
June, 1911 .....	11,085.34	
July, 1911 .....	9,062.59	
August, 1911 .....	12,791.88	
September, 1911 .....	11,040.02	
October, 1911 .....	14,988.79	
November, 1911 .....	14,134.05	
Amount used for building barn.....	1,190.18	\$152,736.92
By balance .....		\$29,692.29

## CASH RECEIPTS FOR MONTH OF DECEMBER, 1910.

*Carpenter's Report for the Two Fiscal Years Ending November 30, 1912.*

---

DR. LOUIS J. PICOT, *Superintendent,*  
*State Hospital, Raleigh, N. C.*

DEAR SIR:—I herewith submit you a biennial report of the work done by this department for the two years ending November 30, 1912.

Besides keeping up the general repairs of the institution, such as keeping the windows, doors, locks, elevators, floors, walls, and furniture in repair, repairing wagons, carts and other farm implements, we have done such painting as possible throughout the buildings.

We have in addition to the above stated work, taken down the old stave silo and built two cement silos, each holding one hundred and fifty tons.

We have built one building, 21x47 feet, adjoining the storehouse, with a cement floor. This building is divided into two separate departments for cleaning vegetables and fish, each room being equipped with tables and sinks for cleaning and washing.

We have built one covered walkway connecting the Erwin Building and the Tuberculosis Building, so that the physicians, nurses and other parties can pass from one building to the other without being exposed to the weather.

We have laid a walkway of vitrified brick between the Erwin Building and the culinary department, in order that the food may be more easily conveyed to the dining rooms.

We have used about five thousand feet of galvanized screen wire, screening the culinary department and all other places necessary.

There has been built one seven room house for the farmer to live in and this department dressed the weather-boarding and framing and made the door and window frames, sash, porch columns, railings, and newels for the stairway.

We have divided the engine room into two separate departments, with the fire pump in one room and in the other room we have built one concrete foundation, 8x22x6 feet, for two generating units. We have laid a hardwood floor in this room, sealed overhead with galvanized iron and whitewashed the walls.

This department assisted in making the steam connection for the electric plant.

We have put wire guards in the Tuberculosis Building and built a porch to the same.

We have fixed up two rooms in the basement, one for the fish and the other for cutting up fresh meats. We ceiled the meatroom overhead

with galvanized iron, put up sanitary shelves and made one large meat block. In the other room we laid a cement floor and repaired the walls.

We have overhauled and put new flooring on the bridge at the entrance to the Hospital grounds and have made and put up one iron gate on driveway leading out by Steward's house.

We have made fifty-four benches of galvanized iron, each five feet long; have built a poultry yard at each end of the epileptic colonies, and have made and put up awnings on the Administration Building, laundry and female epileptic colony.

We have overhauled the old dairy barn, dividing it into three separate departments, corn crib, carriage room and stalls for nine head of horses. In the latter, we have made and put up iron hay racks.

The old wagon and carriage shed has been transferred to the new cow lot and has been covered with galvanized iron and used for sheltering the cattle.

We have constructed two shelters, 10x72 feet, for sheltering farm implements.

We also have under construction twenty heavy iron guards to replace the wire guards that have rusted out in the windows of the seventh ward.

I would recommend the installation of one double spindle shaper, one band saw filer and one tire upsetter. With these machines we could do a lot of our work much easier and save a great deal of time. The cost of the three machines above mentioned would not be over five hundred dollars.

All of which is respectfully submitted,

T. A. HOLLIDAY, *Head Carpenter.*

*Engineer's Report for the Two Fiscal Years Ending November 30, 1912*

DR. LOUIS J. PICOT, *Superintendent,*

*State Hospital, Raleigh, N. C.*

DEAR SIR:—We have, besides keeping up the regular repairs, made the following improvements:

Installed one direct current electric lighting plant comprising one 123-horsepower, 75 k.w. and one 83-horsepower, 50 k.w. a. c. generators, with the necessary exciters, switchboard, fixtures and all connections, with the necessary steam piping complete for utilizing the exhaust steam from these engines and the heating plant.

Put in twenty-five feet of No. 18 drop cord, fifty feet of No. 14 r. c. wire and knife switch for six lights in boiler room; five hundred feet of No. 14 r. c. wire, eight wall switches, two knife switches, fifty feet of No. 18 drop cord for thirteen lights in Farmer's house; two hundred feet r. c. No. 14 wire, one knife switch, twenty-five feet of No. 18 drop cord with fixtures for six lights in Dairyman's house; five hundred feet No. 12 r. c. wire, seventy-five feet of No. 18 drop cord and fixtures, and two knife switches for sixteen lights in dairy barn; eighteen thousand feet of No. 6 wire, six poles, six cross arms, fifteen insulators, and one three k.w. transformer for dairy barn; one hundred and fifty feet of No. 14 r. c. wire, knife switch, and four drop lights in horse stable; seventy-five feet of  $\frac{1}{2}$ -inch conduit, one knife switch, eighty feet of No. 14 r. c. duplex wire, and four ceiling fans for kitchen; eight bells, ten buttons and four hundred feet of bell wire installed in female wards; fifty feet of armored cable, and one drop light in forge shop; one hundred feet of No. 14 r. c. wire, and four drop lights in Engineer's house.

In order to economize in steam and gas, we have installed in the laundry department one 35-horsepower motor, with the necessary oil switches, cables, and other connections to drive the laundry. And in place of the gas stove used for heating irons, we have installed thirty-two electric irons, thereby effecting quite a saving in the consumption of gas. This is all in operation and is running with perfect satisfaction.

Installed one 5-horsepower motor, five hundred feet of No. 10 wire, and one knife switch for meat room; put in fifty feet of No. 14 r. c. wire and two drop lights for store room; one hundred feet of No. 14 r. c. wire and two drop lights for male epileptic colony; twenty-five feet of reinforced cord for one drop light in chapel; installed nine lightning arresters, one hundred feet of No. 14 r. c. wire and one drop light in Steward's house; put in two hundred and fifty feet of No. 14 r. c. wire,

and four drop lights in female Tuberculosis Building; fifty feet of No. 18 armored cable and two drop lights in pipe shop; installed one three k.w. transformer for female wards; put in two hundred feet of No. 14 wire and one drop light for Physician's house at epileptic colony; put in one sink, ninety feet of  $\frac{3}{4}$ -inch pipe, thirty feet of 3-inch pipe, seventy-five feet of 4-inch terra-cotta pipe for vegetable room; one hot water boiler, and seventy-five feet of  $\frac{3}{4}$ -inch pipe for Steward's house; two hundred and fifty feet of 1-inch pipe from pump to ice plant, one sink and thirty feet of  $\frac{1}{2}$ -inch pipe in pipe shop; one lavatory and fifteen feet of  $\frac{1}{2}$ -inch pipe in Main Building; one lavatory, one department; one sink, twenty-five feet of  $1\frac{1}{2}$ -inch pipe, and fifty feet of  $\frac{3}{4}$ -inch pipe in female Tuberculosis Building; one hundred and twenty-five feet of 10-inch pipe and seventy feet of 8-inch steam pipe, twenty-five feet of 4-inch pipe, two traps, two 10-inch separators and one hundred fifty feet of  $1\frac{1}{2}$ -inch pipe in power house; one bath tub, one lavatory, one sink, one hopper, and one flushing tank, four hundred and fifty feet of  $1\frac{1}{4}$ -inch pipe, one hundred feet of 1-inch and seventy-five feet of  $\frac{1}{2}$ -inch water pipe, thirty feet of 4-inch iron soil pipe, three hundred feet of 4-inch terra-cotta sewerage pipe for Farmer's house; one sink, fifty feet of  $\frac{3}{4}$ -inch pipe for Dairyman's house; put in one sink, thirty feet of  $\frac{1}{2}$ -inch pipe and one range in kitchen; one hundred and seventy-five feet of  $\frac{3}{4}$ -inch pipe for poultry yard at epileptic colony; one hundred feet of 1-inch pipe, seventy-five feet of  $1\frac{1}{4}$ -inch pipe for dairy barn.

I herewith present to you some of the improvements in my department which I consider urgent needs, as follows:

First. A change in heating the seventh, eighth, ninth, and tenth wards. In doing this, I strongly recommend a hot water heating system instead of a fan heating system. I would also suggest that there be purchased for this department the following items:

One machine lathe,

One shaper,

One power pipe machine and drill press.

I consider that this equipment would be a great saving to the institution, inasmuch as it would enable this department, in case of the breaking down of any of the machines, to make the necessary repairs without having to send the parts away or ordering new parts, possibly being without the use of the machines and saving the time consumed in getting to and from the shops over town.

Respectfully submitted,

C. T. CAIN, *Chief Engineer.*

## *Report of the Board of Directors*

---

RALEIGH, N. C., December 9, 1914.

*To His Excellency, LOCKE CRAIG,*

*Governor of North Carolina.*

SIR:—The Board of Directors beg leave to submit the Biennial Report of Albert Anderson, Superintendent of the State Hospital at Raleigh, ending November 30, 1914.

We especially call your attention to the urgent needs of this institution for permanent improvements that we must have in order to continue the development so well begun under the progressive administration of our Superintendent.

We also send you the correspondence regarding the proposition to have established a central electric lighting plant to furnish all the State Institutions electric lights in Raleigh, our idea being that should an electric plant be established in the penitentiary, it could furnish all the institutions light and let each pay its pro rata part of the expense in maintaining.

Respectfully submitted,

E. F. AYDLETT,

*President of the Board.*

## *Report of the Superintendent*

MR. E. F. AYDLETT, *President, and Members of the Board of Directors of the State Hospital at Raleigh:*

GENTLEMEN :—I submit herewith the report of the work of this Hospital for the two years ending November 30, 1914.

The Crotalin treatment for epilepsy was reported on in our last Biennial Report. After a trial of a year and three months this was discontinued because no beneficial results were obtained.

There have been two suicides during the last two years—one before my election and one since. Both cases have been reported to your Board and the circumstances.

There has been only one acute disease which threatened to become epidemic—septic sore throat, but a prompt diagnosis by our Pathologist and a general vaccination with antogenous vaccine made in our own Laboratory prevented it. There has been only one case of typhoid fever. Anti-typhoid bacterin is given whenever necessary to prevent this fever.

In your last report it was stated that no male patient had ever been admitted to the wards for the tubercular. Since October 1, 1913, when we put in our Laboratory, we have found tubercular patients among the males in the main building and sent them to the tubercular building, which was erected for this purpose several years ago but had been used for storing grain up to the date just mentioned. After putting in our Laboratory and extending an examination we found additional tubercular patients in our regular female wards, transferring these to the tubercular wards for women, and, increasing the number in this department from seven to fifteen. This work should decrease the danger of infection to regular patients. I refer you to the report of our Clinical Pathologist, as to the extent of his work.

We decided in the beginning of our work that the efficiency of the work on the farm and garden could be largely increased by putting all this under the supervision of one man, and I am glad to report that a large increase in the products of the farm and garden over previous years has justified the wisdom of this act. I refer you to our farmer's report.

We now have eighty-six patients at the Oaks Colony, two of the three buildings are used for the insane and the third for male epileptics, being used to take care of the applications on file at the time of the opening. This building is now full. On account of the crowded condition of the female wards and the number of applications on file awaiting admission, we moved the male patients from the seventh ward to fill the vacancies in the wards of the main building of those transferred to the Oaks Colony, and now have about fifty-two female patients in the seventh ward. While this is inconvenient and more expensive, it has enabled us to take care of all the worthy cases for which application has been made up to date. There are no female patients in our district now in jail.

Our Training School was opened about October 1, 1913, for both male and female nurses. The female school has developed into a most satisfactory condition at present. They are getting six lectures a week on the general course, and two lectures a week on domestic science, the latter given by our Matron. Three years will complete the course and at the expiration of this time we hope to graduate a number of young

ladies, who will have no superiors in training in our State. I am sorry to state that our male school has not succeeded so well. In view of the smallness of the salaries we offer it is hard to induce young men to continue their work and study over a period of three years.

We planned from the beginning of our administration to begin as early as possible giving female patients a variety of vocational work. Finding it impossible to succeed without a trained teacher, however, we made arrangements with the Manhattan State Hospital, Ward's Island, New York (through our friend, Dr. George H. Kirby), to take Miss Dicks for two months for general training. Since September of this year she has worked about fifteen patients in basketry, making artificial flowers, weaving rugs, etc. We need more room and more teachers to develop a variety of occupations, the object of which is for the betterment of the mind. It has proven an effective therapeutic influence in the treatment of patients employed in this department.

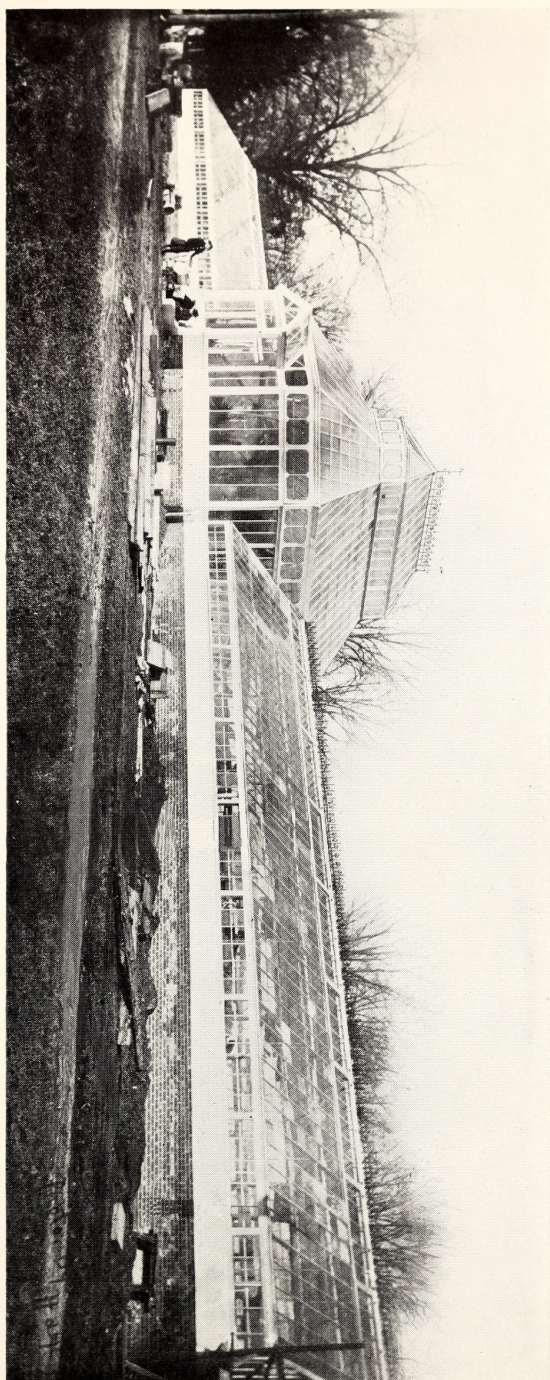

On the male side it is possible to develop many profitable occupations, such as making mattresses, brooms, clothing for men, etc., if we had the room and the teachers. As has been said: "The great majority of insane patients who are occupied at agreeable tasks are easier to control, less destructive and noisy, better contented, and in many instances there remains a residuum of mental capacity which can be made useful by training to a degree that is frequently not suspected." From what has already been accomplished, we hope for much good from this work.

We had the opportunity of buying from the Westbrook Sanatorium, Richmond, Va., for \$500, a greenhouse which originally cost \$15,000. This was taken down and shipped last fall and is now about completed. While it has cost us about \$3,000, it is fully worth \$15,000, and is perhaps the best greenhouse at any Institution in the South. We put it up with our own carpenter force.

After much delay, the work on the spur track was completed last spring. Chain bucket elevators were put in for carrying coal directly into the boiler house. This spur track and machinery for placing our coal into the boiler house, saves upon an average "two and one-half mules and men to haul coal from the chute, besides the wearing out of one mule in one year," as stated in our last report.

After a thorough investigation relative to the efficiency of the Jones Mechanical Stokers, one for each furnace was put in, and according to the test made by Professors Park and Satterfield, a saving of 21 8-10 per cent in fuel is made. These stokers operate with underfeed draft. Thoroughly consuming the coal, they render the combustion smokeless, and also enable us to use the cheapest grade of coal and obtain the same

GREEN HOUSES—STATE HOSPITAL

results with less labor than by feeding the furnace direct. Doing away with the smoke by use of the stokers removes one of the main objections heretofore raised against the nearness of the boiler house to the laundry and main building.

During the Fall of 1913 the Superintendent initiated the movement for bringing the National Mental Hygiene Exhibit to Raleigh. This was in the city two weeks the latter part of November and the first of December, and in connection with it there was held a Conference of distinguished alienists from other States. The exhibit and conference of speakers proved a source of great inspiration to the entire staff of this Hospital. We desire to acknowledge our grateful appreciation of the unselfish service of these Scientists, bringing to us timely messages and giving freely of their valuable time in pointing out the best plans for our development.

Each day we have a meeting of our Medical Staff for a report on new cases and to discuss the condition of the sick and any other matters pertaining to our professional work.

We have also adopted the policy of bringing the medical profession generally into close relationship with our hospital work as often as we have an opportunity. The Wake County Medical Society has held a meeting here during the year; the State Society was given a lawn party during its session in Raleigh last June; and the Sixth Counsellor Medical Society held a clinical conference here at its last meeting. We believe these meetings have been productive of much mutual good to us and to the profession. A chief purpose has been to interest physicians in the mental hygiene movement, in detecting tendencies to mental disorder, and in preventive work.

The list of papers given at Medical Societies or elsewhere by our Staff during the past two years have been as follows:

DR. W. W. STANCELL.

"Paroled Patients."—Mental Hygiene Conference, Raleigh.

"Clinic of Dementia Præcox."—Wake County Medical Society, State Hospital.

"Clinic of Manic Depressive Cases."—Sixth District Medical Society at State Hospital.

DR. T. O. COPPEDGE.

"Some Misunderstandings in Regard to Insanity."—Mental Hygiene Conference, Raleigh.

"Clinic of Paranoics and Paretics."—Sixth District Medical Society, State Hospital.

DR. C. L. JENKINS.

"Clinic on Epilepsy and a Statement on How to Make Out Commitment Papers."—Sixth District Medical Society at State Hospital.

DRS. C. L. JENKINS AND A. S. PENDLETON.

"Crotalin in Epilepsy."—State Medical Society at Raleigh.

DRS. ALBERT ANDERSON AND A. S. PENDLETON.

"Coincidence of Nephropathies and Mental Diseases."—Tri-State Medical Society, Wilmington, N. C.

DR. A. S. PENDLETON.

"Conservation of Health."—Essay, North Carolina Medical Society, Raleigh.

"Prophylaxis as Applied to Mental Diseases."—Mental Hygiene Conference, Raleigh.

Recommendations for appropriation for  
1,050 patients, capacity of the Hospital for the year 1915.....\$183,750

Recommendations for appropriation for  
1,050 patients, capacity of the Hospital for the year 1916.....\$183,750

To obtain the best results in treating and caring for our patients, the following is a list of the urgent needs of the Institution:

A receiving building, estimated cost, for building and equipment for	
100 patients .....	\$75,000
Nurses' Home to provide for forty nurses .....	25,000
Remodeling Chapel .....	7,500
Amusement hall for 1,000 patients .....	21,000
Repairing and renewing heating plant.....	5,000
Kitchen large enough to serve 1,000 patients.....	25,000
Dentist, per year .....	1,200

During the last year we have equipped our engineer's department with a boiler feed pump; turning lathe; drill press; boiler feed heater; and with the improvement connected with the spur track. To the laundry we have added one extractor; two steam chests for mangle; one wash tub and a fan. To the carpenter department, a two-spindle shaper; a band saw filer; a cold tire shrinker and a small metal lathe. For the farm and garden department, we have bought a shredder; a lime distributor; ensilage cutter; a twenty-horsepower engine; two mowers, and six subsoil attachments. The equipment cost \$4,276.68.

Some of the most important improvements and repairs made during my administration since May 4, 1913, have been the following:

1. Repaired and opened the male tubercular building.
2. Repaired and opened the Oaks Colony.
3. Concrete floors put in closet rooms at Erwin building.
4. Outside of main building painted.
5. Heating plant of seventh, eighth, and ninth wards overhauled and repaired.
6. J, K, and A wards repaired and painted.
7. All walls of the rooms and halls on the male side have been white-washed and the floors on the seventh and tenth wards stained.

VIEW OF SEVENTY-NINE HOGS TO BE MADE INTO PORK—STATE HOSPITAL

8. Rubber tracking has been put on the third, sixth, and tenth wards.
9. Installed Jones mechanical stokers.
10. Railroad spur track built.
11. Installed mechanical chain buckets for putting in coal.
12. Greenhouse built.
13. Corn mill and shoe shop put in.
14. Organized fire department.

I am requested by the Insurance Commissioner, Hon. James R. Young, to report to you that our property is insured only about one-third of its value on account of the inadequate appropriation for this purpose, and also to request you to call the special attention of the Governor to this fact.

To the officers and employees who have remained faithful in the service, our most cordial thanks are due, and are hereby given as a public recognition of their loyal coöperation and daily industry in the work of their various departments.

To the members of the Board as a whole and especially to the Executive Committee I wish to tender my sincere appreciation of their many efforts to counsel, encourage and help me in meeting the difficult problems of hospital administration.

All of the above is respectfully submitted,

RALEIGH, December 1, 1914.

ALBERT ANDERSON,  
*Superintendent.*

### *Report of Chaplain*

---

During the year I have conducted religious services in the Hospital chapel each Sunday morning at nine o'clock. There are usually in attendance about two hundred patients and employees, which number taxes the seating capacity of the chapel. The appreciation of the services is manifest on the part of both employees and patients, as is evidenced by their respectful attention and constant attendance.

Respectfully submitted,

R. F. TAYLOR, *Chaplain.*

Coagulation time of blood, number of times taken.....	68

Respectfully submitted,

A. S. PENDLETON,  
*Clinical Pathologist.*

### *Steward's Report*

---

DR. ALBERT ANDERSON, *Superintendent, and the Honorable Board of Directors, State Hospital, Raleigh, N. C.*

GENTLEMEN :—I have the honor to submit to you the biennial report of the Steward covering the period of two years, from December 1, 1912 to December 1, 1914.

The expenditures for the two years will be seen by referring to :

Abstract A will show you the monthly cash receipts and expenditures.

Abstract B will show the expenditures classified.

Abstract C will show the products of the farm, garden and dairy with their market value.

You will here find cash receipts and money expended for maintenance; permanent improvements, etc.

I beg to call your attention to the farm and garden. Our lands are becoming more productive every year. You can see from the estimated value of our farm and garden products for the last two years.

We have been handicapped by the lack of a suitable greenhouse, but this want will soon be supplied as our new greenhouse will soon be completed and then our lands and hospital will compare very favorably with any hospital in our State.

I wish to thank you very much for your unfailing interest taken in our work and for your valued counsel always so willingly given. I extend to our Committee my warmest thanks for the interest they have manifested in our hospital and for the courtesies extended to me personally. I wish to commend very highly our employees who have been faithful in the discharge of all their duties in the various departments, for the loyal and efficient manner in which they have carried on their work.

Again thanking you gentlemen for your support and coöperation, I beg to submit the operations of this department hereto appended,

Respectfully,

A. V. CRAIG, *Steward.*

INTERIOR OF CRIB—SHOWING PART OF THE 800 BARRELS OF CORN—STATE HOSPITAL

# AMOUNT EXPENDED FOR MAINTENANCE AND PERMANENT IMPROVEMENTS.

PARTIAL VIEW OF DAIRY SHOWING SILOS AND COWS—STATE HOSPITAL.

*Report of the Carpenter for the Two Fiscal Years Ending  
November 30, 1914*

---

DR. ALBERT ANDERSON, *Superintendent, State Hospital, Raleigh, N. C.*

SIR:—I hereby submit you a report of this department for the period of two years, as accurately as I can ascertain from observation and inquiry.

We have kept up the general repairing of the Institution, such as putting in windows, and in keeping doors, locks, elevators, floors, walks, and furniture in repair, and repairing wagons, carts, plows, hoes, shovels, harrows, binders, rakes, and all other farm implements.

In addition to the above we have made 500 cement posts, 4 x 6 x 8. These posts being used for a grape vineyard.

We have repaired the metal ceilings on G, K, and J Wards and painted same. Repaired and painted porch in front of G ward, also porch in front of Seventh ward. Laid concrete floor in A ward closet. Tore out stairway leading from basement to F ward, and made cloak rooms for each ward. Laid four concrete floors in Erwin Building, the wooden ones being rotten and dangerous. Overhauled and painted J and K wards thoroughly.

Culinary Department has been thoroughly overhauled. Scraped walls and ceiling and painted same; made new windows and screens to all windows and doors. Made one new door leading out on porch, this makes it convenient to coal and garbage can. Took out stairway in one room and fixed said room for diet kitchen.

Laid four new floors in Laundry Dormitory, and stained same. Repaired floors that were not put in new, and painted same.

Remodeled Steward's house, taking down one chimney, cutting out one partition, and changed two doors. Changed mantles, tinted walls, stained floors, laid one new floor.

Have given the Superintendent's department a general overhauling, cleaned walls and windows, stained floors, screened windows, and laid maple floor in parlor. Repaired seven rooms in Administration Building.

Have kept all the roofs in repair. Made 120 iron lawn benches. Built three coal chutes; also built three receptacles for the coal as it is dumped from the cars.

Have painted all the walls in the three cottages at the Colonies. Repaired roof and rebuilt chimney that was blown down at Female Colony. Replaced broken slate at all the Colonies. Repaired with an outer coat

of cement the boiler room at the Colony, to prevent them from flooding with water that soaks in through the walls.

Repaired sawmill and sawed about twelve thousand feet of lumber, oak, pine, and cedar. Built bridge across Rocky Branch to replace one that was washed away.

Tore down greenhouse in Richmond, shipped same here, and it is almost completed now.

Put awnings at Female Colony and Dr. Jenkins's residence. Built center brick pillow at crib, and put in new sleepers and floor. Covered one stable with tin, at the crib; weatherboarded up door at crib and back ceiling for closet.

Laid cement floor in employees department. Repaired floor on G ward, painted roof and woodwork on outside, and grained front of center building. Painted all windows to the wards and Erwin Building. Put glass in twenty hotbed covers, double covered.

Repaired and painted 350 chairs that had been condemned and thrown away in the waste room. Sterilized and made eighty mattresses from old ones that had been condemned.

Have changed the gearing of the elevator at Seventh ward so that the rope will not wear against the brick. Changed the milk wagon so that it can be kept more sanitary.

Have caught up with the shoe-repairing, and now using the shoe-maker in the mattress department.

All of which is respectfully submitted,

ROBERT GREEN,  
*Head Carpenter.*

*Engineer's Report for the Two Fiscal Years Ending  
November 30, 1914*

---

DR. ALBERT ANDERSON, *Superintendent State Hospital, Raleigh, N. C.*

SIR:—We have besides keeping up the regular repairs made the following improvements:

Installed in boiler room four Jones underfeed stokers, with automatic attachments; one fan, one eleven-horsepower engine, one regulating valve, and one air pipe leading from fan to furnace; one Deane Brothers pump, 9 x 6 x 12; three coal conveyors, complete with all shafting and belting necessary; one twenty-horsepower engine for pulling conveyers and as auxiliary for stokers; one boiler-feed water heater; 150 feet 2-inch pipe, 250 feet  $\frac{3}{4}$ -inch pipe, 50 feet 4-inch pipe, 20 feet 2 $\frac{1}{2}$ -inch pipe, and 200 feet asbestos pipe covering.

Put in the new green house 250 feet 3-inch pipe, 300 feet 2 $\frac{1}{2}$ -inch pipe, 11,000 feet 1 $\frac{1}{2}$ -inch pipe, 350 feet  $\frac{3}{4}$ -inch pipe, 500 feet 1 x 2 angle iron, 200 cast iron fittings for shelves, two steam traps, forty globe valves, one reducing valve, 200 feet 4-inch terra cotta pipe, 250 feet asbestos pipe covering.

Installed at the sawmill one feed water heater, 15 feet 2-inch pipe, 25 feet 3 $\frac{1}{2}$ -inch pipe, and 25 feet 1-inch pipe.

At horse stables 75 feet No. 14 r. c. wire, one knife switch, one double closet complete, 75 feet terra cotta sewer pipe, and 25 feet  $\frac{3}{4}$ -inch water pipe.

Underneath G ward, one steam trap, three globe valves, and 20 feet steam pipe.

Replaced old closet with new on Seventh ward. Replaced old closet with new in Main Building. Put tea and coffee heater in officers' dining-room, using 100 feet gas pipe. Put new pump in brine system for cold storage, put closet in basement dormitory.

Put in Tuberculosis Building 300 feet  $\frac{3}{4}$ -inch pipe and 20 feet 2-inch pipe. Put in Cannery, two steamers, one steam trap, 100 feet 1-inch pipe and five valves.

Put in laundry, four exhaust ventilating fans, 200 feet No. 10 wire, four snap switches, and four fuse blocks. Put in one extractor, added two rolls to mangle, and put new cylinder in sterilizer.

Installed at Steward's Cottage, two sinks, one lavatory, one water tank, 100 feet  $\frac{3}{4}$ -inch black pipe, 100 feet  $\frac{3}{4}$ -inch galvanized pipe, 50 feet 1 $\frac{1}{4}$ -inch black pipe, 150 feet No. 14 r. c. wire, four one-light chande-

liers, one two-light chandelier, ten drop lights, one one-light bracket, one snap switch, and one knife switch.

Put in Machine Shop one Bradford 18 x 8 engine lathe, one Champion drill press, one grindstone, one emery grinder, together with all belting and shafting necessary.

For Feed Barn and Dairy one feed cutter with blower, one shredder, and one twenty-horsepower engine.

Put in Erwin Building 100 feet  $\frac{1}{2}$ -inch pipe, 25 feet 2-inch pipe, four traps, 50 feet conduit, 50 feet duplex No. 14 r. c. wire. Put 150 feet railing on porch at Oaks Colony.

Put in Amusement hall one motion picture machine, 300 feet No. 6 stranded wire, 150 feet  $\frac{3}{4}$ -inch conduit, and one knife switch.

Put in Main Building one bath tub, one sink, one lavatory, one water filter, 100 feet  $\frac{1}{2}$ -inch pipe, 23 feet 1-inch pipe and 75 feet drop cord.

Put in on female wards 100 feet bell wire, three bells, 5 push buttons, and three electric batteries. Put in on male wards 150 feet  $1\frac{1}{4}$ -inch pipe and one radiator.

Put in Kitchen one slop sink, one dish sink, one coal range, one gas range, one drop light, 50 feet  $\frac{1}{2}$ -inch pipe, 14 feet 3-inch pipe, 20 feet  $1\frac{1}{2}$ -inch pipe, 23 feet  $\frac{3}{4}$ -inch pipe, and one cesspool.

Respectfully submitted,

JAMES C. ALBRIGHT, *Engineer.*

TEAM OF HORSES—STATE HOSPITAL
